Dear Information Professional,

EBSCO Publishing is pleased to continue to provide high quality resource databases for the US Embassies. Please take note of the new pricing as well as the new collections now available on EBSCOhost.

The new databases are:

Computer Science Index: \$1,200

The collection consists of indexing and abstracting for more than 500 periodicals and books, with coverage going back to the mid 1950s. *CSI* focuses on subjects such as artificial intelligence, expert systems, system design, data structures, computer theory, computer systems and architecture, software engineering, human-computer interaction, new technologies, social and professional context, and much more.

Hospitality and Tourism Index: \$1,200

HTI is a bibliographic database covering scholarly research and industry news relating to all areas of hospitality and tourism.

International Political Science Abstracts: 1 user: \$1,780.00 2-4 users: \$2,140

IPSA, produced by the International Political Science Association, includes current indexing and abstracts of the world's leading journals in political science. This database contains over 100,000 records from nearly 900 journals published from 1989 to the present. Approximately 7,800 new records will be added to the database each year.

PAIS International: 1 user: \$3,500 2 users: \$4,900

PAIS International, produced by the OCLC Public Affairs Information Service, provides global coverage of public affairs and world issues, with an emphasis on issues in the public debate. Some topics covered are: affirmative action, AIDS, climate change, ethnicity, gay rights, environmental degradation, globalization, political persecution, urban planning, women's rights, war and conflict, and weapon stockpiles, to name a few. It includes references to more than 518,000 journal articles, books, government documents, statistical directories, gray literature, research reports, policy papers, Internet documents, conference reports and other sources from more than 120 countries, with materials in English, French, German, Italian, Portuguese and Spanish. In addition, 4,300 web sites are included in *PAIS International*. Each record includes a standard bibliographic citation, an informative abstract and up to nine subject headings. The subject headings and abstracts are in English.

Scientific American Archive Online: \$300.00

Scientific American is the oldest continuously published magazine in America. Now current issues of the magazine are combined with a large backfile of this authoritative source of scientific and technical information, and are available online as a stand-alone database. *Scientific American Archive Online* is a comprehensive, searchable science and technology resource containing the full text and graphics of every *Scientific American* issue from 1993 to the present. Among the topics covered in the archive are: health and medicine, cosmology and astronomy, chemistry, life sciences, physics, oceanography, medicine, mathematics, archaeology, and much more.

Textile Technology Index: \$1,200

Textile Technology Index™ provides extensive coverage of the scientific and technological aspects of textile production and processing. The Textile Technology Index contains indexing and abstracting for over 400 periodical titles and for thousands of titles drawn from sources such as books, conferences, theses, technical reports and trade literature. Subject coverage includes manufacturing techniques, textile end products, chemicals and dyes, the properties of natural and synthetic fibers and yarns, environmental issues, and the related areas of chemistry, biology and physics.
